Professional Experience

Software Developer

[Big Bee] — [Yangon]
[May 2023] – Present

Contributing the development of a comprehensive e-commerce platform, including:

- **Admin Website:** Built with Next.js to provide seamless management of products, orders, and users.
- **Shopper Website:** Developed with Next.js to offer a dynamic and user-friendly shopping experience.
- **Admin App:** Created using React Native to allow administrators to manage operations on the go.
- **Shopper App**: Designed with React Native to offer customers a mobile shopping experience.
-

I am currently collaborating with our teams to define, design, and ship new features. I implement responsive design and ensure cross-browser compatibility. And optimize applications for maximum speed and scalability. we utilize Github project to manage project timelines and deliver high-quality software.CircleCi and Github action for continuous integration and continuous delivery/continuous deployment.

Front-End Developer

[-] — [Remote]
[Feb 2022] – [Jun 2022]

I joined a local team as a remote front-end developer to build a job-seeking website for a recruiting company. In that project, I use Axios for making HTTP requests to interact with backend services and utilized Redux for state management to ensure efficient data handling and application performance.And I collaborated closely with team members to develop user-friendly interfaces using React.
